

Dear Faculty Members and Students,

As the Dean of the School of Science, it is my pleasure to welcome you to another academic year filled with exploration, discovery, and growth. Our school encompasses seven dynamic departments, each contributing to the rich tapestry of scientific knowledge and innovation.

In Biotechnology, we delve into the cutting-edge realm of genetic engineering, bioprocessing, and biomedical research, striving to address pressing global challenges through innovative solutions.

Botany and Zoology departments delve into the fascinating world of plant and animal life, exploring biodiversity, ecological dynamics, and conservation efforts crucial for sustaining our planet's delicate ecosystems.

Physics and Chemistry departments push the boundaries of scientific understanding, from unraveling the mysteries of the universe at the quantum level to synthesizing novel materials with unique properties and applications.

Mathematics serves as the backbone of scientific inquiry, providing the tools and methodologies necessary for modeling complex systems, analyzing data, and uncovering fundamental truths about the world around us.

Finally, the Food and Nutrition department plays a vital role in promoting health and well-being through research into the nutritional properties of food, food safety, and the development of sustainable agricultural practices.

Together, these departments form a vibrant community of scholars, researchers, and educators dedicated to advancing scientific knowledge and addressing the challenges of our time. I encourage all members of our school to actively engage in interdisciplinary collaboration, seize opportunities for professional development, and foster a culture of inclusivity and respect.

As we embark on this academic journey together, let us embrace curiosity, innovation, and the pursuit of excellence in all that we do. I am confident that through our collective efforts, we will continue to make meaningful contributions to the world of science and inspire future generations of scientists.

Wishing you all a productive and fulfilling year ahead.

Sincerely,

Dr. Asha Mishra

Dean, School of Science
